## Planet word museum dc

The 10 most commonly used letters in English are E, A, R, I, O, T, N, S, L, and C. WASHINGTON, October 22, 2020 /PRNewswire/ -- Today, Planet Word, a revolutionary museum dedicated to the power, beauty and enjoyment of language and to show how words shape human experience, opened its doors to the public. Planet Word, based in Washington, D.C.'s historic Franklin School, is the world's first voice-controlled museum, with immersive galleries and exhibits that will engage visitors of all ages in experiencing words and language from a wide range of perspectives. General admission is free. Based on the belief that literacy is fundamental to the health of democracy, Planet Word aims to inspire and renew a love of words, language and reading. Appreciation of the power of language promotes empathy and stimulates social discourse. By engaging people of all ages with language, Planet Word encourages visitors to fall in love with the joy and whimsy of words and understand how important they are to American society and our world. I am so happy to open the doors of Planet Word to the public and can't imagine a more appropriate time for a museum of language to open in our nation's capital, said Planet Word founder and CEO Ann Friedman. Democracy depends on literate citizens. I hope planet word can provide a forum for a social discourse and a place where our community, in all its vibrant diversity, can gather to share the words that bridge differences and forge solutions. The museum held a mostly virtual ceremony to commemorate the public opening. This event featured comments from District of Columbia Mayor Muriel Bowser and Planet Word founder Ann Friedman. It also included comments from writer and actress Anna Deavere Smith and a performance by spoken word artist Charity Blackwell, as well as a musical performance by Renee Fleming, a freestyle hip hop performance by rapper Christylez Bacon, and a poetic dedication written for the occasion by Naomi Shihab Nye. Planet Word supporters including former President Barack Obama, former New York City Mayor Michael Bloomberg and Grammy-winning musician Paul Simon also made surprise virtual appearances. Planet Word is the world's first major museum with a high-tech approach to bringing language to life. It features ten immersive learning galleries designed by exhibition design agency Local Projects that use technology in imaginative, ingenious ways to reinvent the modern museum experience. Among the museum's voice-activated exhibits is Where Do Words Come From?, a 22-foot-tall talking word wall that shares the story of the English language through a conversation with and extraordinary lighting effects. Other highlights include an acoustically enclosed space where visitors use a teleprompter to give one of eight historically important speeches; a karaoke lounge where music lovers will learn secrets of great songwriting; and a secret poetry corner hidden in the piles of a magical library. In other galleries galleries can create an advertising campaign, literally paint with words using smart brushes, and converse with native speakers of many spoken and endangered languages. The gift shop was designed by Nate Berkus, the well-known interior designer, author and television personality. In the spring, Planet Word looks forward to welcoming the buzzworthy, cause-casual eatery, Immigrant Food, as its restaurant partner - to be housed in the museum. Immigrant Food, whose values and mission closely align with Planet Word, opened its flagship location right next to the White House in 2019 for rave reviews. In the newly created courtyard entrance to the museum, Speaking Willow - the first permanent installation in D.C. by renowned contemporary artist Rafael Lozano-Hemmer - provides an immersive language experience for visitors upon arrival at Planet Word. The metal sculpture, resembling a howling willow, plays voice recordings from hundreds of different languages as visitors pass under the branches. The interactive sound and light sculpture features 364 individual speakers and 3.6 miles of Ethernet cable and was commissioned by Ann and Tom Friedman in collaboration with the Public Art Fund in New York. Planet Word builds on the long history of innovation at the Franklin School, a National Historic Landmark building and the site of both one of the city's first public schools and the world's first wireless voice transmission, an achievement achieved by Alexander Graham Bell in 1880. Over the past two years, the building has undergone major restoration and rehabilitation, funded by Ms. Friedman, and led by the architectural firm Beyer Blinder Belle in collaboration with general contractor Whiting-Turner. The project included the restoration of the rising Great Hall - the architectural centerpiece of the building - and replication of the original frescoes; the two large staircases with ornate railings and original ceramic tile steps have been restored to their former grandeur. For more information on the significance of Planet Word's home at the Franklin School, visit PlanetWordMuseum.org/Franklin-School. Planet Word, like Washington, D.C., is all about celebrating art, creativity and innovation, said Mayor Bowser. This beautiful museum has found the perfect home in Downtown DC at the former Franklin School, where both children and families will enjoy a unique cultural and educational experience. Thank you to Ann Friedman and my team at the deputy mayor's office for planning and economic development for bringing this national historic milestone back to life. Planet Word previously announced a multifaceted partnership with Shared\_Studios, a global collective that creates meaningful human connections between people separated by distance and difference through transformative conversations in both virtual environments. The museum is home to one of Shared\_Studios' Portals, which is equipped with immersive AV technology that allows visitors to and interact with people from all over the world as in the same room. Visitors to the Planet Word Portal will connect live with others around the world - discovering the richness of languages and how words shape our lives, our decisions and our relationships. The DiverCITIES initiative of Planet Word and Shared Studios - a program that explores the similarities and uniqueness of languages in cities and cultures around the world - was launched online in September. Each month, through moderated conversations with comedians, poets, artists, journalists, educators and activists, DIVERCITIES D.C. will connect locals with colleagues in cities in the Portal network, including Lagos, Erbil, Milwaukee, Mexico City, Berlin and Dallas. For more information about this initiative and other Planet Word programming, visit PlanetWordMuseum.org/Events. Since breaking ground in June 2018, Planet Word has reached its original \$20 million fundraising goal to cover the creation of the museum's exhibitions, experiences and start-up costs. Planet Word's generous donors include AT&T, Bloomberg Philanthropies, Carolyn Bucksbaum, the Diller-von Furstenberg Family Foundation, Ann and John Doerr, Microsoft Corporation and Christine and Stephen A. Schwarzman. The rehabilitation and restoration of the Franklin School as a home for the museum was funded and overseen by Ms. Friedman. Planet Word is open Thursday to Saturday from 10 a.m. to 5 p.m. General admission is free, with a proposed donation to support the museum's mission-driven programs, exhibitions, and educational outreach. As a result of Covid-19, the museum has introduced a number of safety procedures, including limiting the capacity in the building to support social distancing. Planet Word advises visitors to book timed passes online prior to their visit; a limited number of passes may be available for first-come, first-served walk-ups. Masks are mandatory for all visitors over two years of age. Stylus pens compatible with the museum's interactive exhibits will be available to prevent visitors from touching surfaces, and hand sanitization stations are located throughout the museum. To register for tickets and check visitor guidelines, go to PlanetWordMuseum.org/Plan-Your-Visit. About Planet Word Planet Word is a non-profit museum dedicated to the power and fun of language. Founded by philanthropist Ann Friedman, the museum will invite visitors of all ages to discover what words mean for the human experience in a fun, technologically advanced, immersive environment. Opened to the public on October 22, 2020, Planet Word is housed in the Franklin School on 13th and K NW, a National Historic Landmark with a rich history in public education and the site of the first wireless voice transmission by Alexander Graham Bell in 1880. Planet Word's board includes leaders in education, media, real estate, technology, the arts and museums, led by President Ann Ann Restoration and rehabilitation of the Franklin School was overseen by Beyer Blinder Belle; The main contractor was Whiting-Turner. Planet Word's project partners are local exhibition design and media production projects, Solomon Group as exhibit fabricator, installer and AV integrator and Lone Shark Games for the development and production of Lexicon Lane: A Word Sleuthing Adventure!
